## Enormous Amaryllis

Amaryllis bulbs were a seasonal favorite of my grandmother's and their instant results and huge flowers make them a holiday favorite still today. Simply plant the large bulbs indoors in a pot of soil, water them and watch them bloom within 4 weeks. They are so easy, sometimes they even bloom before they are planted! They make a nice house warming gift or select one for yourself.

This year we are featuring a collection of the largest amaryllis bulbs I have ever seen. These are enormous 44 cm bulbs. You have to see them to believe how big they are – as big as coconuts. We have them in the traditional red, the elegant white and nice combination red & white. Also this year, we have included in our collection a beautiful, deep burgundy colored amaryllis (a more conservative 34 cm) the color is such a dark red I'm sure it will be a show stopper.

After your amaryllis blooms, remove the spent stem but nurture the leaves with regular care and feeding. Place the pot outdoors after danger of frost passes and keep it watered while the long, strap-like leaves replenish the bulb. At summers end, lay the pot on its side so it receives no water, allow the leaves to wither and just as winter approaches, pick the pot up, clean it up by removing all the foliage, then begin to water it again, it will bloom for you year after year.

## Add Fragrance at the Holidays with Blooming Paperwhites

Paperwhites make a wonderful, simple, living gift to warm a heart and a home. Plant a bunch of bulbs in a low container filled with pebbles. Water and watch them grow indoors. They will bloom within six weeks. When finished blooming, they can be planted permanently outdoors.

Create a nice gift by filling a standard 6" terracotta pot with soil and bulbs and inverting a clay saucer over the top for a lid. Tie it all together with a raffia bow. Once watered, this pot full of bulbs will begin to grow and if kept indoors, will bloom in about 6 weeks.

Amaryllis also make a nice gift for forcing indoors. These are huge bulbs, some as big around as soft balls. We have an assortment of colors to choose from.

### SPECIAL NOTICE!!

**1/2 OFF All Spring Flowering Bulbs**  
(except for Amaryllis and Paperwhites)

## Choose Some of The Best Pruning Shears

Felco brand pruning shears are the highest quality pruning shears we are aware of, worldwide. ## Living Christmas Trees & Alternative Ideas Keep on Giving for Years to Come!

Consider a living tree to decorate this holiday season.

**Colorado and Alberta spruce** are two great traditional choices.

If you want to be daring here are some fun alternatives: **citrus** already decorated with fruit, **Japanese maples** whose bare branches are lovely covered with little white lights, a holly plant, a blooming **Yule Tide camellia** whose bright red single flowers may well be decoration enough, or a **bonsai styled evergreen**. All of these possibilities would make great landscape plants at the season's end.

If there's no room in your garden how about donating your plant to the garden of a local school, park or church? What a great way to green our communities.

Don't forget to decorate your porch, patio or garden with colorful blooming plants. **Sasanqua camellias** are in their glory. Choose from bright red Yule Tide, clear white Setsugekka, soft pink Jean May, bright rose Kanjiro or bicolor Hana Jiman (white with a pink edge) just to name a few. Each has a different flower form and growth habit. **Cyclamen** are in full bud and bloom. These winter favorites are great bright shade/ morning sun performers. Choose from red, white, pink, rose and lavender shades. Consider **English primroses** as well. They come in red, white, rose, pink, yellow and blue.

Here are some helpful hints to keep your living Christmas tree healthy and happy. This is a hard one – try to minimize its indoor time. A week to ten days is a good maximum to be in the house. Choose a well lit area away from the heat of a fireplace or furnace. Protect the floor with a cork trivet topped with a large saucer to catch the watering water. In between deep waterings water your plant with ice cubes that slowly melt (helpful hint: use a turkey baster to relieve excess water from the saucer after the plant has had an hour or so to reabsorb it). Decorate with small lights and light weight ornaments.
